11/28/68

Dear Ross,

Your 11/25 6-page letter on legal pager arrived as I was leaving yesterday. I do not now have time to reread if, for I am another day behind. I write you to assure you that you are not alone in blowing them, that those for whom there is less excuse do it more often (including me), and that you may as well, when you are 21, learn this is an inevitability of life. So, do not take it too seriously. You did the right thing in sending me your clearest recollection immediately, and that is quite helpful.

When the tape arrives, probably not until after I return from the coming trip, I'll listen to it and see what we have.

I am interested in everything I can get about Bringuier.

These are strange people. In Coup d'Etat I call them the "dedicated wrong. They actually believe all that irrational and illogical stuff, actually come to believe what they invent themselves.

Questioning these people is a very good idea and often elicits information from them. However, what they think of Garrison really means nothing, regardless of what they think. Better to keep them to a meaningful point.

For reasons you cannot anticipate, what you report of Fensbez-Hunt is of special interest. If he mentions HLH again, please let me know what he says.

I'd be interested in knowing if Alan is related to Kent Courtney. Can you get someone else to ask him? Do not finger yourself of you'll get cut off before you get to say a word. Kent is editor and publisher of what he calls, with profound disrespect for the dictionary, "The Independent American". He is in New Orleans.

Again my thanks, and loose no sleep over the go ofs.

Sincerely,
